EDUCATION

WESTERN INSTITUTE OF TECHNOLOGY La Paz, Iloilo City, PH
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY *May 2027*

ILOILO NATIONAL HIGH SCHOOL-SHS La Paz, Iloilo City, PH
GENERAL ACADEMIC STRAND(GAS) *July 2023*

EXPERIENCE

PAWADOPT – STRAY DOG RESCUE & ADOPTION PLATFORM La Paz, Iloilo City, PH
Sole Developer *January 2026 - Present*

- Independently architected, designed, and developed an end-to-end multi-portal web platform (Citizen, Shelter Admin, and Local Government Unit) digitizing municipal stray reporting, rescue dispatch, and adoption workflows across Iloilo City.
- Leveraged modern AI developer tooling (Antigravity) to rapidly scaffold frontend components and prototype UI views, maintaining full ownership over system architecture, database design, and user experience.
- Integrated an interactive mapping interface with Mapbox GL JS, allowing citizens to drop precise GPS location pins for rescue sightings, validated against municipal boundaries.
- Implemented real-time operational rescue boards utilizing Supabase Realtime, automatically reflecting report status changes without requiring page reloads.
- Designed an administrative ticket consolidation interface to merge duplicate reports from multiple citizens into single actionable rescue cases.

OFFICIAL WEBSITE OF BSIT WIT La Paz Iloilo City, PH
Front-End Developer *March 2026 – August 2026*

- Co-developed and maintained the official web platform for the Western Institute of Technology BSIT program, serving as the central digital hub for departmental resources, announcements, and events.
- Employed AI-assisted workflows to translate design requirements into responsive React and Tailwind CSS components, ensuring clean mobile and desktop layouts.
- Collaborated using Git and GitHub within a student developer team, actively participating in bug fixes, component refactoring, and UI performance maintenance.

BSIT STUDENT ATTENDANCE SYSTEM La Paz Iloilo City, PH
Front-End Developer *June 2026 - July 2026*

- Engineered responsive React client interfaces for a PERN-stack attendance verification and logging web application.
- Built high-speed student ID verification and real-time confirmation UI, actively utilized by 300–500 BSIT students during assemblies and academic events.
- Implemented client-side validation logic and real-time state handling to eliminate manual paper rosters and prevent duplicate entries.
- Implemented export functionality enabling users and administrators to download complete morning and afternoon attendance session records.

LEADERSHIP & ACTIVITIES

PSITS – WESTERN INSTITUTE OF TECHNOLOGY CHAPTER La Paz Iloilo City, PH
Core Front-End Developer *March 2026 – August 2026*

- Engineered modular React UI components and layout templates for student-facing web platforms.
- Resolved front-end rendering bottlenecks and improved mobile responsiveness across departmental pages.
- Enforced Git version control conventions and collaborative branch workflows across student developer teams.

SKILLS & INTERESTS

Frontend: React, JavaScript (ES6+), HTML5, CSS3,Vite
Backend: Supabase, PHP, MySQL, Node
Tools: Git, GitHub, Antigravity, VS Code, Vercel
Interests: Gaming, Project-based self-learning
